# 2010 Pass Defense

Yar, mateys!

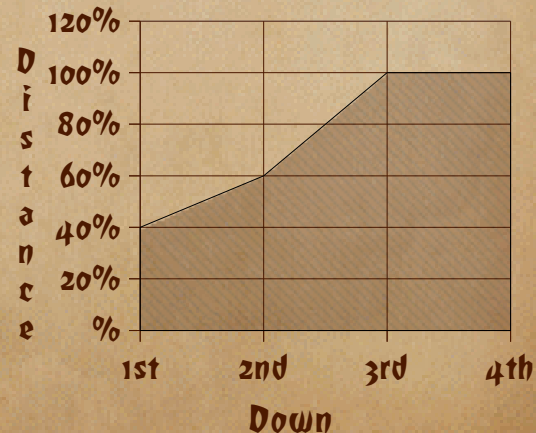

Here I be again... I've come about for another "Reckonings" from th' last season. I did th' run defense in th' last loggin'. Now, it's time to be lookin' at th' pass defense...

Firstly, some of th' same things apply th' way they did for th' run defense. Some things are different for th' look at th' pass defense. Namely, "Tackles" and "Stops" were used to look at runs. While "Tackles" are th' same for pass plays, they ahrr not th' only way to stop a pass play. Add "Interceptions" and "Defenses"  to "Tackles", and call them "Plays". "Stops" differ for pass defense by using "Plays" instead of just "Tackles"  for th' cipherin'. Because they ahrr self-inflicted, "Incompletions" ahrr not to be merited as part of th' pass defense...

Secondly, also different from run defense, thar be two aspects to pass defense... "Coverage", th' main focus of this report, and "Pressure". Our krewes was highly ranked in th' league for coverage, but th' worst for pressure. Could one part have something to do with th' other part? More to be written later... on that regard...

Check th' "Perspective", "Krewes Inspections", "Manifests", and "From th' Poop Deck"... and th' notes, too !!!

Defensive Stops

# Krewe Inspections

WTB?

As ye scroll through th' followin' pages, ye will see some new fangled colors. Cooky's gruel went bad, but I found it fit for inkin' these charts.

Th' red ink shows "interceptions", th' orange shows passes that were "defensed"... Pay no mind that they be shown at 5 yards behind th' line of scrimmage. That just be my way of makin' them stand out... Heed ye this, tho'... th' tackles behind that scrimmage line really did happen... Th' pewter ink shows th' yardage, on "stops", whar offense needed to gain a new set of downs... Yar, and th' dark ink shows whar "tackles" were made...

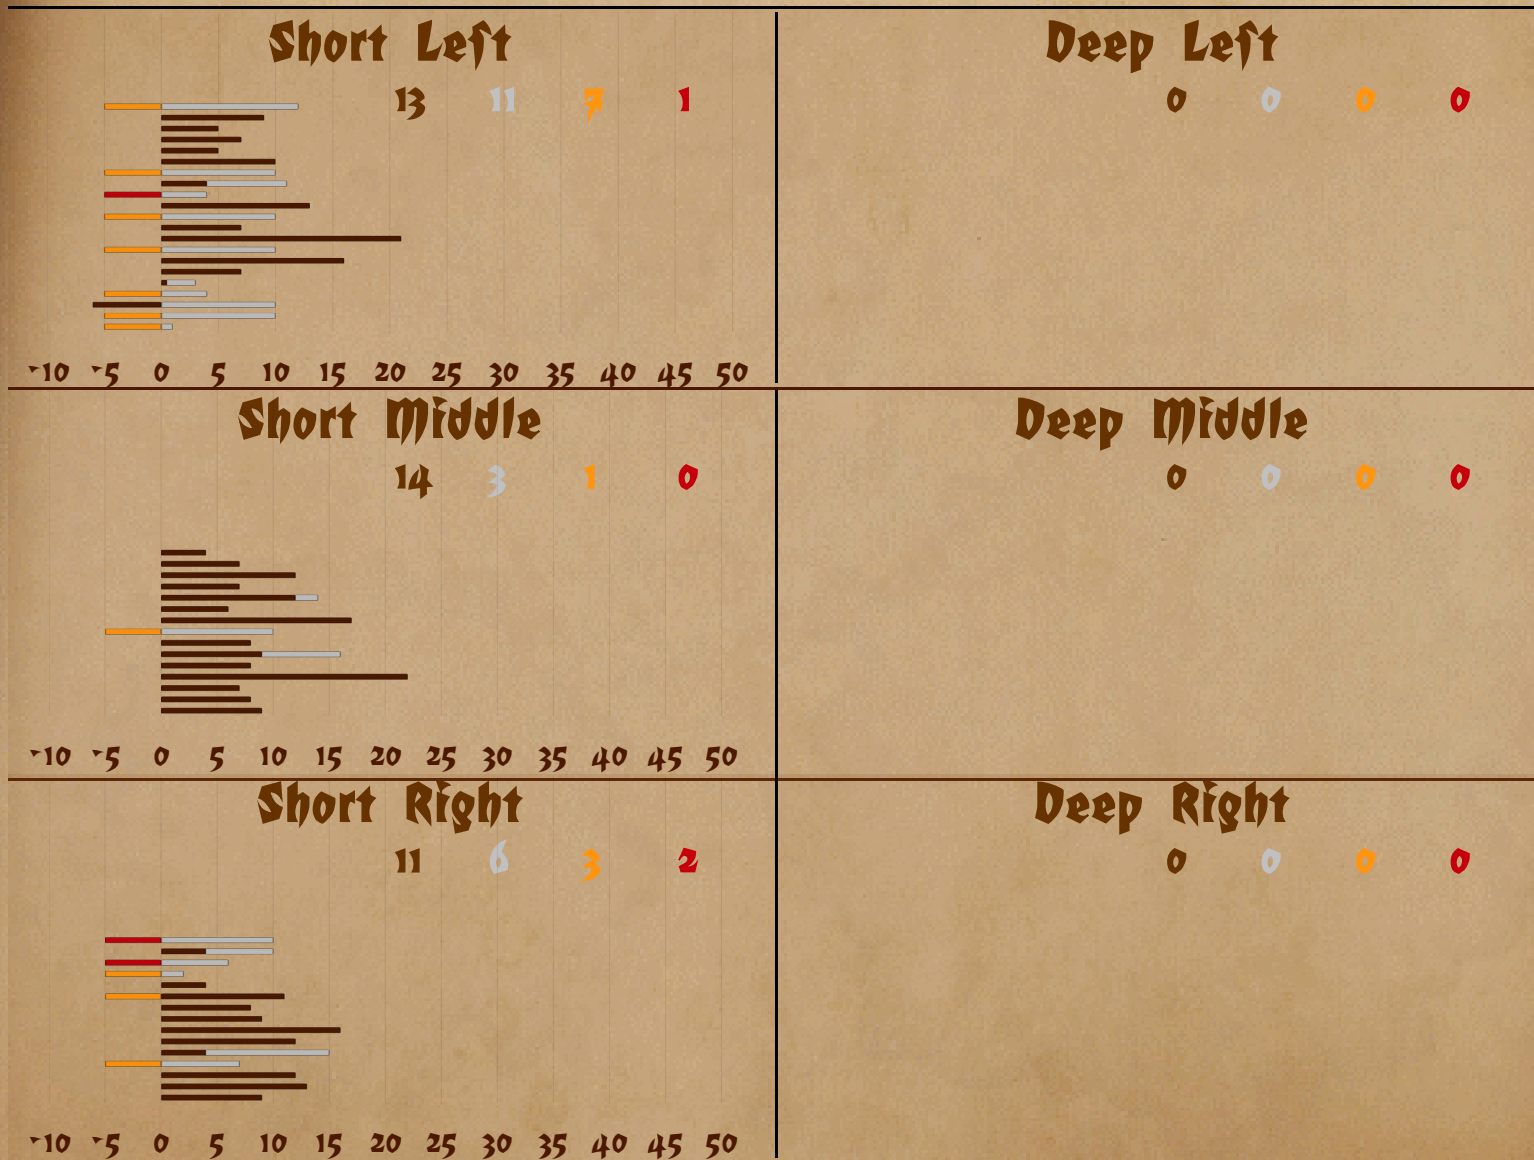

Again, these charts ahrr scaled for easy comparisons...

# From th' Poop Deck

WTB?

Th' thing that stands out, if ye hadn't noticed from all th' Calico Jumpin' Jacks I've been doin', is how often th' pass attack went to th' short variety. I wonder how others around th' league stack up,? In particular, those with islands named after them...

Most significant was the deep middle zone, whar no completion occurred after th' fifth game. Add to that, 22 of th' 26 sacks came after that fifth game... Th' other 4 sacks came at Carolina in week two, and we know how they can be purrloined... Th' pace of th' QB Hits picked up after week 5, too... So, what happened to change things? First, a wild and free safety got tossed in th' brig after th' second game... hoisted by his own Tanard. He was replaced by a rookie, who took a few games to get th' feel of things. Th' start was Grimm. Then, his play improved. But, when th' replacement went down to injury, a second year player named Lynch came in. He played further back than th' other two had before him... All of this with Sean Jones learning to fit in... That's th' coverage side of th' tale... At th' same time, a highly prized rookie was findin' his sea legs along th' line of scrimmage... up 'til he had a problem with his arm... and, if ye were on that line, ye may not have known who it were that manned th' spot next to ye !!!

What does all this scrawlin' add up to? Plainly said... if a quarterback doesn't have a deep threat to his avail, he won't hold th' ball long enough to get sacked. So, he'll just check it off to a short route...

Stats ahrr for Lubbers... Ahrrr !!!
